

ENGR. JOHN CARLO BESAS RABANES, ECE

ELECTRONICS ENGINEER | PRC NO. 0073854

09669343065 | rabanes.johncarlo1994@gmail.com

Objectives

Electronics Engineer (ECE) with 6+ years of field experience in OLT installation, integration, and site acceptance for Globe Telecom projects. Proven track record in site surveys, power tapping, commissioning (Huawei/Fiberhome), NOC support, and OSP fiber works. Skilled in Globe processes including TSSR, MOP, ISDP, PrePAT, RLA, and ABDOcs. Additionally, a proactive developer of internal software tools (Android, Python, JavaScript) that automate MOP/TSSR generation, billing, and project management. Seeking to leverage hands-on telecom engineering experience and process automation skills as an OLT Roll-Out Engineer at Nokia to drive successful OLT deployments across Globe's network infrastructure.

Personal Details

Address: Zone 2, Igpit, Opol, Misamis Oriental
Date of Birth: July 14, 1994 (32 yrs old)
Birth Place: Guindulman, Bohol
Marital Status: Single
Expected Salary: To be discussed during the interview

Education Details

Secondary: Opol National Secondary Technical School SY 2010 – 2011| NC2 in Electronics Technology
College: Liceo De Cagayan University SY 2016-2017 | Bs in Electronics and Communication Engineering (ECE)

Date Pass the Boards: May 2019

Core Competencies

OLT & Transport: OLT installation, integration, commissioning, power tapping, card migration, NE profile creation

Globe Processes: TSSR, MOP, ISDP, PrePAT, RLA, ABDOcs (Asbuilt Plan & Pictures)

NOC & Tools: UNM2000 NMS, Citrix, SecureCRT, Packet Tracer, port assessment, remote fiber patching

OSP & Fiber: Fiber splicing (NAP to household), OSP troubleshooting, LCP, FTP management

Equipment: Huawei, Fiberhome OLT, DITO/Smart transport equipment

Soft Skills: Field team supervision, budget management, escalation handling, Globe coordinator liaison, training and mentoring new engineers, project coordination and negotiation

Professional Experience

OLT Roll-Out Engineer – Nokia Shanghai Bell | May 2026 – Present
Deployment and Installation:

- Coordinate with clients and supervise subcontractors for the physical installation of OLT chassis, cards, and fiber cabling at central offices or remote cabinets.
- Oversee deployment activities to ensure sites are delivered on time and within budget.

Commissioning, Integration, and Testing:

- Perform software installation, initial configuration, and integration of OLTs into the network management system.

- Conduct Preliminary Acceptance Tests (PAT) and Final Acceptance Tests (FAT) to ensure hardware and software meet quality standards before going live.

Troubleshooting and Documentation:

- Identify, analyze, and resolve technical issues during the installation, commissioning, or integration phases.
- Maintain accurate records of installation configurations, site survey reports, and test results.
- Collaborate with project managers, field teams, and subcontractors to ensure smooth project coordination.

Process Automation & Software Development:

- Independently developed and deployed 9 internal software applications using Android, Python, and JavaScript to streamline field operations and administrative workflows.
- Created automated tools including MOP (Powertapping & Integration) Generators, an Ericsson to Nokia TSSR Generator, a Billing/Materials Grabber, and PRAMS (Project Rollout and Management System) to reduce manual errors and save engineering hours.

Senior Technical Engineer - Neo-Tech Asia Distribution| |December 20, 2025 – May 15, 2026

- Provide technical engineering support for distribution and field operations
- Troubleshoot and resolve equipment and system issues to ensure uptime
- Collaborate with cross-functional teams to meet project deliverables

Network Engineer / IT Department Head – Polymedic Medical Group | April 18, 2024 – Sept. 15, 2025

- Managed IT infrastructure, network administration, and hospital information systems (HIS) in a healthcare environment
- Designed and implemented IT policies and procedures to enhance efficiency and compliance
- Led IT team to deliver technical support aligned with organizational goals

Senior Technical Engineer - Fiberhome Technologies | December 2020 - November 2022

- Conducted site surveys and authored Technical Site Survey Reports (TSSR) per Globe standards
- Installed, power-tapped, and integrated OLT equipment following approved Method of Procedures (MOPs)
- Used ISDP to complete PrePAT activities and prepared Asbuilt Plan & Picture documentation (ABDOcs)

Additional Responsibilities

Acting Supervisor (September 2022 - November 2022)

- Oversaw OLT projects for Northern Mindanao cluster.
- Presented weekly activities, managed technical engineers, and allocated budgets
- Provided remote and on-site support including site surveys, TSSR/MOP creation, installation, power tapping, commissioning, integration, NE profile creation, PrePAT, and technical query resolution.

NOC Support (December 2020 – November 2022)

- Delivered remote support for card migration, card insertion, OLT integration, PrePAT, and RLA (Remote Live Acceptance) via NMS (UNM2000)
- Conducted port assessments via NMS to ensure port availability for new LCP insertions
- Supported external ODN teams with port assignments and supplied updated FTP as required
- Provided remote fiber patching support and performed Remote Auto Detect & Throughput testing for NAP

Technical Engineer – Insystic Corp. | July 2020 – December 2020

- Conducted site surveys and created TSSRs for designated sites per Globe standards
- Led OLT installation, power tapping, and integration following approved MOPs
- Used ISDP for PrePAT activities and prepared ABDOcs documentation

Commissioning Engineer – J's Quintas Telecom Services | September 2019 – June 2020

- Installed and commissioned Huawei transport equipment for Globe, Smart, and DITO sites
- Loaded scripts for system integration and conducted QC checks via ISDP QC
- Rectified Punch List (PL) issues to ensure optimal functionality

Systems Engineer – Intellisoft Microcomputer Systems | November 2017 – May 2018

- Generated work orders for PC, laptop, and printer check-ups; compiled daily progress reports

- Installed alarm systems and CCTV setups; performed LAN cabling and maintenance repairs

Software Development & Technical Skills

Internal Applications Developed (9 tools built to streamline operations):

1. Raawa Generator
2. MOP Powertapping Generator
3. MOP Integration Generator
4. Billing PO No. and Materials Grabber
5. MRF Generator
6. Telecom Layout Studio
7. PRAMS (Project Rollout and Management System)
8. Ericsson TSSR to Nokia TSSR Generator
9. APW Reimbursement App with Justification and MPR

Project Management & Soft Skills

- Adept at addressing and resolving queries from supervisors, area managers, in-house, and subcontractor personnel.
- Strong communication and problem-solving abilities.
- Reporting site issues, managing documentation for site closure, and coordinating with Globe Telecom personnel.
- Capable of providing training to new technical engineers and presenting weekly schedules.
- Competency in project coordination, negotiation, management, and monitoring.
- Customer service acumen, technical support, and efficient project escalation management.
